Reading Off Road? Fuel Security And Land Rights In South Africa

Reading Off Road? Fuel Security: Theoretical Roman Archaeology Conference

Note: this paper was first published in 2014 in the peer-reviewed journal *On-Policy*, Volume 14, pp. 207-212. This version is a pre-proof copy. Please accept that this version is for the author's personal use only.

In about two decades since the end of apartheid, South Africa still faces numerous challenges, many of which relate to the legacy of the apartheid system. One of the most significant of these is the legacy of land rights. The 1996 Constitution of South Africa (1996) and the 1997 Land Use Planning and Management Act (1997) have provided a legal framework for land rights, but the implementation of these laws has been slow and uneven. This paper examines the challenges of land rights in South Africa, and the role of the state in addressing these challenges. It also discusses the role of the private sector in land rights, and the role of the community in land rights. The paper concludes that the state has a key role to play in addressing land rights in South Africa, and that the private sector and the community also have a role to play.

The post-apartheid Constitution of the Republic of South Africa, Act 108 of 1996, for example, contains provisions that seek to address poverty reduction and other social imperatives. These provisions are part of the Constitution's broader vision for the right to basic human needs, and are intended to be implemented through the development of a new social contract. The Constitution also provides for the right to basic human needs, and the right to a fair and equitable distribution of resources. This paper examines the challenges of land rights in South Africa, and the role of the state in addressing these challenges. It also discusses the role of the private sector in land rights, and the role of the community in land rights. The paper concludes that the state has a key role to play in addressing land rights in South Africa, and that the private sector and the community also have a role to play.
